

**T.L Studio Company** (reg. no. 106334)

B424-B433, Lot 11054, Tower B2,
Tower B2, Level 4, ICOM Square,
Jalan Pending, 93450 Kuching, Sarawak,
MALAYSIA

TAX No: IG 24238246000

SOFTWARE & SOLUTIONS CONSULTANCY RATES

Effective Year: 2026

Engineering and software solutions consultancy fees for cross-industry initiatives.

All engineering and solutions consultancy fees are quoted in Malaysian Ringgit (MYR) and aligned with current premium regional senior consultancy benchmarks.

1. Core Consultancy & Architecture Rates

Service Pillar	Hourly Rate	Daily Rate (8 Hours)
Data Engineering & Analytics Architecture Data strategy, ingestion pipelines, schema designs, and cross-system telemetry integrations (e.g., IoT farm data, ESG carbon accounting log consolidation).	RM 150 – RM 300	RM 1,200 – RM 2,400
Infrastructure, Cloud & DevOps Consultancy Designing high-availability edge/serverless topologies (Cloudflare Workers/KV/AWS Lambda), containerized workspace deployment, and CI/CD pipelines.	RM 180 – RM 350	RM 1,440 – RM 2,800
Software Engineering & Implementation Hands-on full-stack development, API routing (Hono/NodeJS stacks), lightweight web/mobile frontend component assembly, and hardware/software bridges.	RM 120 – RM 250	RM 960 – RM 2,000
Ancillary Tech Services & Scoping Technical competitive analysis, operational scoping documentation, devcontainer ecosystem audits, code reviews, and framework optimizations.	RM 100 – RM 200	RM 800 – RM 1,600

2. Fixed-Scope Turnkey Project Deliverables

Project Type	Description	Ballpark Investment (MYR)
Data Strategy Blueprint	Comprehensive data mapping and pipeline schema blueprint supporting up to 3 primary upstream/downstream integrations.	RM 8,500 – RM 16,000
Edge Cloud Architecture	Zero-maintenance, highly distribution-resilient serverless worker deployment layout configured with integrated globally cached KV namespaces.	RM 6,500 – RM 13,000
Modular RESTful API Engine	Clean architectural framework setup utilizing lightweight runtimes (e.g., Hono/Edge Worker scripts) with customized routing structures.	RM 5,500 – RM 10,000
Hardware Telemetry Bridge	Raw telemetry data parser pipelines or system emulator automation tools tailored to safely funnel remote IoT logs into production targets.	RM 8,000 – RM 15,000
Technical Code & Debt Audit	Complete software stack audit highlighting framework conflicts, vulnerability exposure, performance hot-spots, and dependency path repairs.	RM 3,500 – RM 6,000

3. High-Margin Value-Added Packaged Offerings

- **The "Zero-Infrastructure Cost" Optimization Audit (RM 4,000 – RM 7,500 flat fee)**
A specialized technical evaluation auditing bloated cloud server resources to map out a migration roadmap targeting global edge infrastructure—designed to cut static operating overheads while ensuring limitless scale.
- **Rapid Proof of Concept (PoC) / MVP Bundle (RM 14,000 – RM 22,000 fixed price)**
A fast-tracked 30-day agile build delivering a clean, functional single-purpose application prototype (e.g., live sensor data dashboard, raw operational metric ingest system) to quickly validate internal metrics or demonstrate proof-of-concept for key stakeholders.
- **Technical Compliance & Schema Standardization (RM 5,000 – RM 9,000 flat fee)**
Restructuring heavily unorganized operational datasets (such as disparate legacy spreadsheets or raw unstructured logs) into standard public open formats or ESG reporting structures.
- **Infrastructure & Failover Maintenance Retainer (RM 1,800 – RM 4,000 / month)**
Monthly recurring operational monitoring, continuous system health inspections, edge pipeline failover tracking, and API router configuration management ensuring full peace of mind.

For personalized scope customisations or localized enterprise project tenders, please contact T.L Studio Company directly.
